Subject: RE: Fact Sheet clarifying question - Will the plan call for excavation of all trenches?
Attachments: Parcel_G_RAD_WorkplanFactSheet__Jun2018a.pdf

Hi Lily,

Attached is the final version of the fact sheet being released to the public today. Thank you for pointing out the clarification needed in the trenching section; your comment was incorporated.

I will also send the fact sheet to the Community Engagement Team.

Thanks,
Kellie

Subject: [EXTERNAL] Fact Sheet clarifying question - Will the plan call for excavation of all trenches?

Thank you Kellie for sending the Parcel G Fact sheet this morning. It's very helpful to the public to summarize a complicated document to improve understanding by a layperson audience.

I noticed the 2nd page of the fact sheet, first "arrow" states: "For soil sampling in former sanitary sewer and storm drain line trenches (up to 22 feet below ground surface), 100% of the soil will be excavated to the original trench boundaries." This sentence sounds to me as if all trenches will be excavated. (Core sampling is one form of soil sampling.) Of course, I have not seen the latest draft. Is that the Navy's plan up front? If not, then further clarification could help the reader to understand the plan correctly.

In addition, attached are other comments from Jackie.

Thank you again for doing important public outreach work.
